

## Specifications of spiral staircases in painted steel:

the stairs in question are custom-made from an outer diameter of 120 cm. to a maximum standard of 220 cm.(it is possible to get cm 300 too). The inner and outer bands are made of FE 430. Angle, step and riser are optimized according to the specific situation; an anchor to guarantee rigidity is necessary at the half of the stair.

**Steps:** wood types on demand, glass, possibility to prepare the support for stone treads.

**Finishes:** the product is suitable for the widest customization, the bands can be in micaceous iron finish or mural made; the wood can also be finished in the sample.

**Railings:** painted steel, satin stainless steel, wood.
